

# InsightStream: Navigate the News Landscape

## Introduction

**Project Title:** InsightStream Navigate the News Landscape.

**Team Leader:** Silambarason.R-(silambarason05@gmail.com)

**Team Members:** Santhosh.S -(sinimani1971@gmail.com)

Ajay.P -(a06608302@gmail.com)

James.D -(samsung115dj@gmail.com)

## Project Overview

**Purpose:** InsightStream is a modern web application designed to redefine how people discover and consume news.

### Features:

- Real-time news updates from various API sources.
- Intuitive design for seamless navigation.
- Advanced search functionality to filter news based on interests.
- Category-based news filtering.
- Subscription feature for newsletters.
- User-friendly interface built with React.js.

## Architecture

### Component Structure:

- **Navbar Component:** Provides easy navigation across different pages.
- **Hero Component:** Displays trending news and the search bar.
- **Category Component:** Organizes news based on selected topics.
- **News Article Component:** Shows complete articles from API sources.
- **Subscription Component:** Allows users to sign up for daily news updates.
- **Footer Component:** Contains additional information and links.

### State Management:

- Context API is used for global state management.

- useState and useEffect hooks manage local state within components.
- API calls are handled using Axios.

### **Routing:**

The app uses React Router Dom for handling navigation across multiple pages.

## **Setup Instructions**

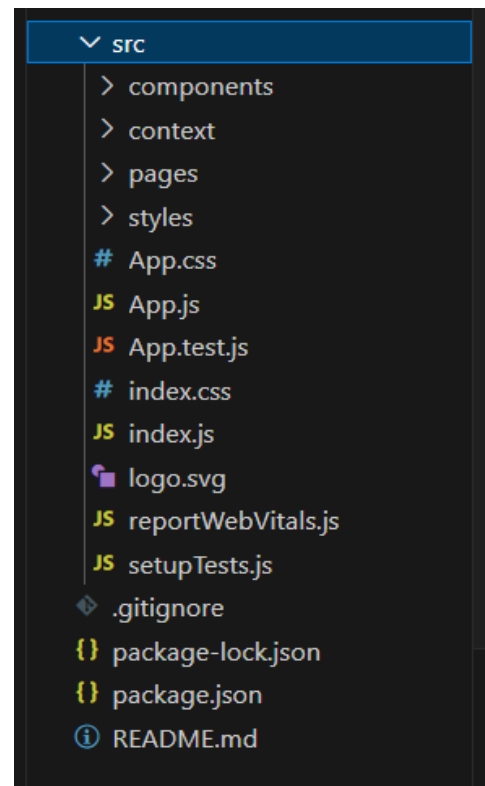

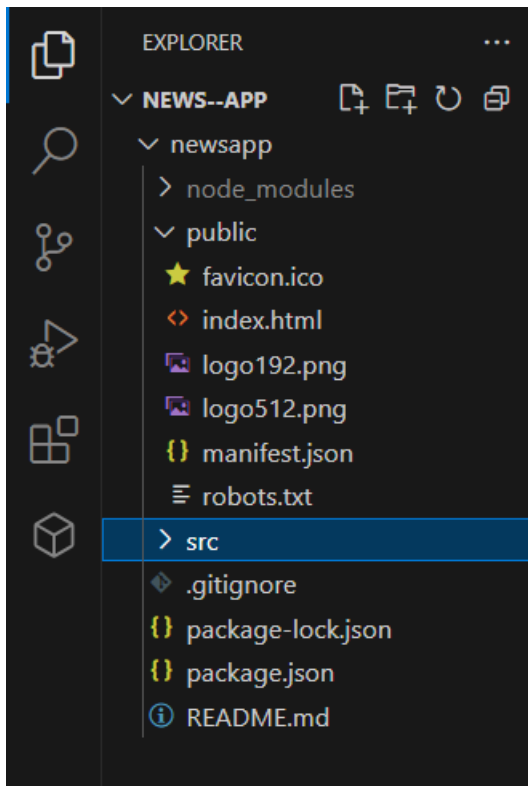

### **Prerequisites:**

- Node.js (<https://nodejs.org/en/download/>)
- npm (Node Package Manager)
- Git for version control (<https://git-scm.com/downloads>)
- React.js
- Code Editor (Recommended: Visual Studio Code (<https://code.visualstudio.com/download>))

### **Installation:**

1. Clone the repository: ``git clone [repository-url]``
2. Navigate into the project directory: ``cd news-app-react``
3. Install dependencies: ``npm install``
4. Start the development server: ``npm start``
5. Open <http://localhost:3000/> in your browser.

## Folder Structure

## Running the Application

To start the frontend server locally: ``npm start``

## Component Documentation

### Key Components:

- **Navbar.js:** Handles navigation links.
- **Hero.js:** Displays featured news and search functionality.
- **Category.js:** Fetches and displays news by categories.
- **NewsArticle.js:** Displays full news articles.
- **Subscription.js:** Allows users to subscribe for updates.
- **Footer.js:** Contains the application footer.

## API Integration

InsightStream fetches data from external sources using Rapid API and NewsAPI.

Example API Request:

[https://newsapi.org/v2/everything?q=popular&apiKey=YOUR\\_API\\_KEY](https://newsapi.org/v2/everything?q=popular&apiKey=YOUR_API_KEY)

## Styling

Tailwind CSS and Bootstrap are used for styling.

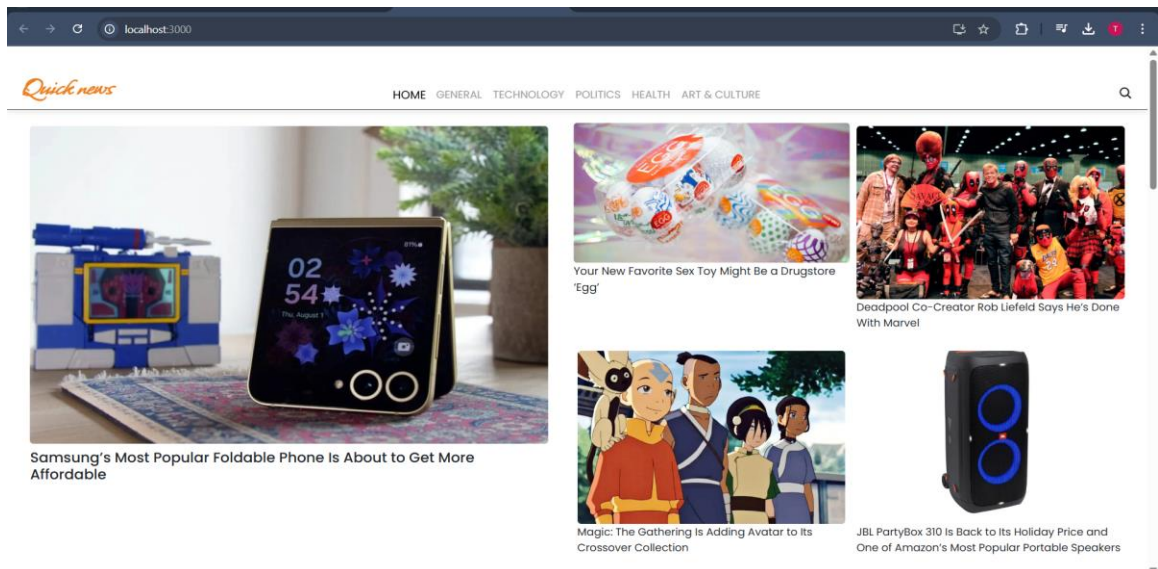

## Testing

### Testing Strategy:

- Jest & React Testing Library for unit testing.
- Cypress for end-to-end testing.

## Screenshots

- Screenshots:

## Known Issues

- API rate limits may impact performance.
- Some UI elements may need further responsiveness adjustments.

## Future Enhancements

- User authentication for personalized news feeds.
- Dark mode and additional themes.
- Integration with social media for news sharing.
- Offline reading capabilities.
